

2QAA May Colour Challenge – Priscilla Lawrence

Achromatic colour scheme

This month's challenge is an easy one – we are doing an **achromatic colour scheme**.

This has no colour (hue) at all, ONLY black, white and grey. This colour scheme is clean and simple and entirely relies on value to work – ie contrast between dark (black) and light (white) and medium (grey) shades.

Not to be confused with a monochromatic colour scheme which is using only ONE colour in its various forms (tints, shades and tones)

Permitted 'colour' range:

Below is an example – white cheesecloth on black fabric, some of the cheesecloth was coloured with black or white paint and stitched with black and white thread.
